**This course is designed for police officers who have a current Field Training Officer (FTO) certification. Officers whose certification has expired are not eligible to participate.**

This course is designed to update the Field Training Officer (FTO) on training their trainee learned while in the academy. The first part of the class is dedicated to Integrated Communication Assessment Tactics (ICAT). This is a technique the trainee was taught on how to defuse critical incidents. The second part of training will include Emergency Vehicle Operations which will include evaluating the trainee on normal driving habits and safety considerations while involved in pursuit driving. Topics to be discussed are pre-pursuit safety considerations, proactive measures to take before a pursuit, and when to terminate the pursuit.

**Upon completion of this course, the student should be able to:**

1. Discuss integrated communication assessment and tactics.
2. Evaluate their trainee during driving performance such as proper positioning in seat and vehicle, and proper hand position.
3. Recognize safety considerations while FTO is involved in pursuit and when the FTO should terminate pursuit.
4. Identify and properly critique unsafe driving habits in a new trainee.
5. Identify tools that trainees can use to defuse critical incidents.
6. Demonstrate an understanding of the principles of ICAT.
7. Identify how critical decision-making model will assist the trainee in responding to critical incidents.

This course is designed to meet requirements as mandated by the Maryland Police Training Commission and to meet the annual in-service requirements.
